## Especificación técnica

|                                     |               |                                                  |      |
|-------------------------------------|---------------|--------------------------------------------------|------|
| Brand                               | NOARK         | Nominal rated current [A]                        | 25   |
| IP                                  | 20            | Rated fault current [A]                          | 0.03 |
| EAN Code                            | 8592765083142 | Leakage current type                             | AC   |
| Frequency                           | 50Hz          | Selective protection                             | No   |
| Mounting method                     | DIN rail      | Short-circuit breaking capacity (Icw) [kA]       | 6    |
| Width in number of modular spacings | 2             | Surge current capacity [kA]                      | 3    |
| Power loss [W]                      | 3.4           | Additional equipment possible                    | No   |
| Number of poles (total)             | 2             | Construction size (in accordance with DIN 43880) | 2    |
| Nominal rated voltage [V]           | 230           | Short-time delayed tripping                      | No   |
