## Instructions

with 5 meter cables solar panel

with 5V output power supply

## Important

1. Please check the lights before installation whether it is working properly.
2. Press the button of the light before you use  
If you press "AUTO" (red button) means enter the day-night sensor mode, the light will auto "ON" at night, and auto "OFF" during the day;  
Note: The remote control must be towards the control receiver of the light.
3. Remote control distance is 8-10m.
4. A - Fix the lamp on the place you want, but please avoid the water.  
B - The solar panel should adjust the angle towards the sunshine.  
C - Lamps cannot be installed in low-lying area, avoid water going inside.
5. Connected the plugs, then enter into charging mode.
