SAFETY INSTRUCTIONS

1. Do not look directly into the light sources when they are switched on - risk of discomfort and eye damage.
2. Protect the product from contact with sharp tools and hard, sharp edged objects - risk of malfunction and material damage.
3. The product is not waterproof when the charger is connected.
4. Spent batteries must be properly disposed of in compliance with local regulations.
5. The battery cannot be replaced.
6. IP54 rated products are splash proof and protected against the ingress of solid objects larger than 1mm in diameter.
7. Never modify the product in any way.
8. Keep children and pets at a safe distance from electrical products.
9. Lighting fixtures must not be installed on damp surfaces.

CHARGING

Charge the product before use by connecting the charger to the charging port type C at the base of the product. The indicator light will be red while charging. The indicator light will turn blue when charging is complete.

INSTRUCTIONS FOR USE (Select the brightness)

1. Touch the switch at the top to adjust the brightness. The indicator light will turn white.
2. Hold the switch down to adjust the brightness from high to low. Release the switch at your preferred brightness.
3. Hold the switch down to increase the brightness again.
4. Turn off brightness setting mode by briefly tapping once on the switch.

INSTRUCTIONS FOR USE (Select colour temperature)

1. Hold the switch down for 3 seconds to change the colour temperature. The indicator light will turn blue.
2. Tap briefly on the switch to change colour temperature.
3. Hold the switch down for 3 seconds again to turn off colour temperature setting mode.

TECHNICAL DATA

Rated voltage	3.7V
Power	2.5W
Luminous Flux	280lm
Protection rating	IP54
Protection during charging	IP20
Battery technology	Li-ion
Battery capacity	2 x 2200mAh
Battery life	6.5 h
Charging time	6 h
