

OPTONICA

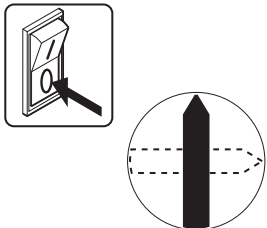

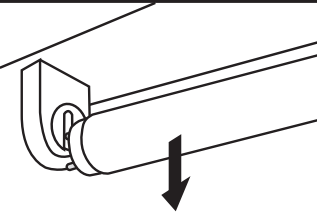

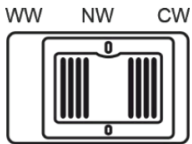

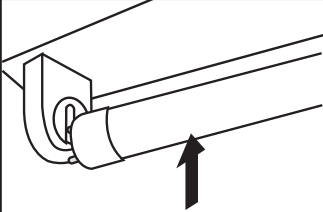

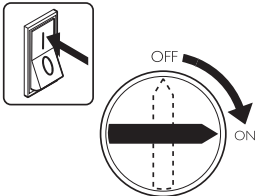

LED Tube T8 CCT Selectable User Manual

Operational Notes

1. After unpacking check that the products are in good condition. If there is any problem, please contact us.
2. For Indoor use only.
3. Switch off the power supply when installing or changing the tube.
4. Not for use with dimmer.
5. Not for use with DC power.
6. When not in use, store in cool, dry and clean environment.
7. Installation should be carried out by a qualified electrician or technician.
8. Tube is to receive power just to one end.

Installation Procedures:

1. Turn off the power. 	2. Take out the old fluorescent tubes and remove/bypass the ballast, if there is any. 	3. Select the color temperature (3000K, 4000K or 6000K) through the CCT switch on the LED lamp base. 
4. Install the LED tube. 	5. Turn on the power. 	Note: To prevent damage to lamp, lamp must not be energized when color selector switch is changed. Note: Take care to not connect L/N reversely.

LED пура T8 CCT Ръководство за употреба

Инструкции за работа

1. След разпаковане проверете дали продуктите са в добро състояние. При наличие на проблем, моля свържете се с нас.
2. Само за вътрешна употреба.
3. Изключете захранването при монтаж или смяна на тръбата.
4. Не е подходяща за използване с димер.
5. Не е подходяща за използване с постояннотоково (DC) захранване.
6. Когато не се използва, съхранявайте на хладно, сухо и чисто място.
7. Монтажът трябва да се извършва от квалифициран електротехник или техник.
8. Тръбата трябва да получава захранване само от единия край.

Процедура по инсталиране:

1. Изключете захранването. 	2. Извадете старите луминесцентни тръби и премахнете дросела, ако има такъв. 	3. Изберете цветна температура (3000K, 4000K или 6000K) чрез CCT превключвателя в основата на LED лампата. WW NW CW 
4. Монтирайте LED тръбата. 	5. Включете захранването. 	Забележка: За да предотвратите повреда на лампата, тя не трябва да бъде под напрежение, когато се сменя превключвателят за избор на цвят. Забележка: Внимавайте да не свържете фазата (L) и нулата (N) наобратно.

LED T8 Röhre CCT einstellbar Bedienungsanleitung

Hinweise:

1. Bitte prüfen Sie die Produkte nach dem Auspacken sorgfältig auf Schäden oder Mängel. Bei Unregelmäßigkeiten setzen Sie sich bitte umgehend mit ihrem Händler in Verbindung.
2. Dieses Produkt ist ausschließlich für den Innenbereich vorgesehen.
3. Vor der Installation oder dem Austausch der T8-Leuchte ist die Stromversorgung vollständig auszuschalten.
4. Diese Leuchte ist nicht dimmbar und darf nicht mit Dimmern verwendet werden.
5. Nicht für den Betrieb mit Gleichstrom geeignet.
6. Lagern Sie das Produkt bei Nichtverwendung an einem sauberen, trockenen und kühlen Ort.
7. Die Montage darf ausschließlich durch qualifiziertes Fachpersonal erfolgen.
8. **Achtung:** Die T8-Röhre ist nur für einseitige Stromzufuhr vorgesehen – eine beidseitige Einspeisung ist unzulässig.

Installationsanleitung:

1. Stellen Sie sicher, dass die Stromzufuhr abgeschaltet ist. 	2. Nehmen Sie die alten Leuchtstoffröhren heraus und bauen Sie das Vorschaltgerät (sofern vorhanden) aus. 	3. Die Farbtemperatur (3000K, 4000K oder 6000K) kann über den CCT-Schalter am Lampensockel eingestellt werden. 
4. Setzen Sie die LED-Röhre ein. 	5. Schalten Sie die Stromzufuhr wieder ein. 	Hinweis: Um Beschädigungen der Lampe zu vermeiden, darf die Lampe beim Umschalten des Farbwahlschalters nicht unter Spannung stehen. Hinweis: Achten Sie darauf, dass L (Phase) und N (Neutralleiter) korrekt angeschlossen sind und nicht vertauscht werden.

Tubo LED T8 con selezione CCT MANUALE DELL'USO

Note operative

1. Dopo aver disimballato, controllare che i prodotti siano in buone condizioni. In caso di problemi, contattateci.
2. Solo per uso interno.
3. Spegner l'alimentazione elettrica durante l'installazione o la sostituzione del tubo.
4. Non utilizzare con dimmer.
5. Non utilizzare con alimentazione in corrente continua (DC).
6. Quando non in uso, conservare in un ambiente fresco, asciutto e pulito.
7. L'installazione deve essere effettuata da un elettricista o tecnico qualificato.
8. Il tubo deve ricevere alimentazione solo da un'estremità.

Procedura di installazione:

1. Spegner l'alimentazione elettrica. 	 2. Rimuovere i vecchi tubi fluorescenti ed eliminare/ bypassare il ballast, se presente.	3. Selezionare la temperatura di colore (3000K, 4000K o 6000K) tramite l'interruttore CCT posto sulla base della lampada LED. 
 4. Installare il tubo LED.	5. Accendere l'alimentazione. 	Nota: Per evitare danni alla lampada, non deve essere alimentata mentre si cambia l'interruttore di selezione del colore. Nota: Assicurarsi di non invertire la connessione di L e N.
