Speicherfunktion: EIN ~10 s / AUS ~10 s

- EN**
- 1: By switching the light on and off in quick succession, you can choose between 3 different light levels.
 - 2: Select the desired light level (Mode 1, Mode 2 or Mode 3). Wait at least 10 seconds so that the setting can be saved.
 - 3: The next time the light is switched on, it will start with the saved light level.

- BG**
- 1: Чрез бързо включване и изключване на светлината можете да избирате между 3 различни нива на осветеност.
 - 2: Изберете желаното ниво на светлината (Режим 1, Режим 2 или Режим 3). Изчакайте поне 10 секунди, за да може настройката да бъде запаметена.
 - 3: Следващия път когато светлината бъде включена, тя ще стартира със запаметеното ниво на осветеност.

- DE**
- 1: Durch schnelles Ein- und Ausschalten des Lichts können Sie zwischen 3 verschiedenen Helligkeitsstufen wählen.
 - 2: Wählen Sie die gewünschte Helligkeitsstufe (Modus 1, Modus 2 oder Modus 3). Warten Sie mindestens 10 Sekunden, damit die Einstellung gespeichert wird.
 - 3: Beim nächsten Einschalten des Lichts startet es mit der gespeicherten Helligkeitsstufe.

- IT**
- 1: Accendendo e spegnendo la luce in rapida successione, puoi scegliere tra 3 diversi livelli di luminosità.
 - 2: Seleziona il livello di luminosità desiderato (Modalità 1, Modalità 2 o Modalità 3). Attendi almeno 10 secondi affinché l'impostazione venga salvata.
 - 3: La prossima volta che la luce verrà accesa, partirà con il livello di luminosità salvato.
