Compatibility Note

- Please make sure your car supports wired car-play/Android Auto
- Required iPhone6 or later iPhone models with IOS 10 or above for wireless car-play function
- Required an Android smartphone that support latest Android Auto function and with Android 11 or higher of the Android operating system for wireless Android Auto function.

How to confirm if your car has Apple wired Car-Play or Android Auto function

Method 1:

Connect your iPhone or Android smartphone to your car by USB data cable and see car-play or android auto logo on your car display.

Method 2:

Check the compatible list below or check with your car manufacturer to see if your car has this capability.

Check out the website for supported car models.

How to use

1. Start the car and wait for the car head until system to be loaded
2. Connect the Wireless Car-play Android auto adapter to the USB-A or USB-C port in your car, please be sure plug the adapter into the port that is for wired apple carplay or android auto.
3. Open WIFI and Bluetooth on your iPhone/Android smartphone and find the BT named "WirelessDongle_****"; Click on Pair; Click on 'Allow'; Click on Use Carplay or 'Use Android Auto'.

1. Pair Bluetooth 2. Allow contacts and favorites Sync 3. Use CarPlay

4. You are ready to enjoy wireless car-play or wireless Android Auto.

LED Light Description

- Cyan status: Power on indicator
- Green status:
 1. Car-play connecting (green light fast flashing)
 2. Car-play connected (green light slow flashing)
- Blue status:
 1. Android connecting (Blue light fast flashing)
 2. Android connected (Blue light slow flashing).

Please note

1. The wireless Car-play Android Auto adapter working principle is uses BT to establish a pairing between the iPhone/ Android smartphone and the vehicle, then switches to using WIFI to maintain the wireless connection. After the BT pairing is successful, the iPhone/Android smartphone WIFI will automatically connect to the adapter's WIFI, and then disconnect the Adapter BT connection by default for carplay and automatically connect to your vehicle BT by default for Android auto.

2. Please ensure wireless Car-play Android auto Adapter power indicates blue light is on.

3. Please ensure that your car models supports wired carplay/Android auto

Package list

- 1x Wireless Adapter
- 1x User Manual

FQA

1. What is the WiFi password for the Wireless Car-play Adapter?

We need to connect the bluetooth not Wi-Fi. After BT matching is successful, WiFi will automatically connect. So no need Wi-Fi password. Make sure your Wi-Fi is turned on and unoccupied when pairing.

2. After pairing Android Auto adapter, can not start Android Auto function or compatible/ can not recognize the USB...

- 1) If your car has used the android auto function for the first time, please use your data cable to connect your phone to activate android auto through a wired method.
- 2) Please make sure that android auto on your android phone is the latest version. If not, please log in to your google play account to update to the latest version.
- 3) Please turn off the BT of your phone and enter the mobile application management to search auto to clear the auto cache. After the cleaning is completed, restart the adapter and reconnect to it.

3. Audio input or output issues : calls rejected or forwarded to voicemail/ no play sound /microphone not working/music playback interrupted or paused /voice functioning abnormally..

1) Please check if the iPhone/Android smartphone's BT connect to other devices such as Earphone, watch... If so, please disconnect other auto-connected BT devices or turn the BT directly for car-play and connect to your vehicle bluetooth for android auto

2) When on a call, check that your "Audio" output option is Car-play/Android Auto

4. When use the wireless car-play Android Auto Adapter whether Mobile Phone can use other internet wifi

When enjoying the wireless android auto adapter function, the phone's WiFi will be occupied by the adapter. So you can not use other internet at the same time. You only can use your phone SIM card internet.

5. Unable to automatically reconnect

- 1) Please make sure that the BT and WiFi functions of your mobile phone are turned on and the Bluetooth is not occupied when you get in the car
- 2) Clear the pairing record , restart the phone and repair the Adapter

6. Can the adapter be paired with multiple phones

The adapter can be paired with maximum five phones, but only one device can be connected at a time if you would like to pair it with a new phone , please cancel the current connection first. Please note, by BT function default, the adapter's system will only auto-connect back to the last used phone.

7. Can't find the bluetooth and Wi-Fi of the wireless Car-play Android Auto Adapter ?

Please make sure wireless Carplay Android auto adapter power indicates blue light is on and be sure plug the adapter into the port that is for wired carplay/ Android auto.

If convenient , Please test it with another Phone. If only a specific phone cannot find the BT or Wi-Fi of the adapter please try to reset the network and bluetooth settings of this Phone and then restart the phone once , if the same problem happens on other Phone , it will be defective, please let us know.

8. Whether Wireless Car-play Android auto Adapter support Youtube Video

For driving safety, Car-Play and Android Auto do not allow the use of video playback

Online update

- the adapter works properly, it means the current version is suitable for your car. It is not recommended to update the firmware
- Only try this solution when the problem you cannot solve from the "FQA"

1. Power up the adapter	
2. Connect the adapter's WiFi the password is '12345678'	
3. Open web browser and enter '192.168.1101' to enter the setting page and click 'Online Update' for Car-play function	
4. For Android auto, Please Click 'Switch P2P' Then Click 'OK'	
5. Return to WiFi Connect, Find 'Wi-Fi Direct' option. Then connect the Available devices (Smart Adapter****) (This step is for reference only for Android phone users. If use iPhone update the firmware, please ignore 'Wi-Fi Direct' step)	
6. Return to the browser's page Click 'Update' (PS: the signal light of will flash when it reached 70%, and it will return to normal after successful)	
7. On the same page, you could also fill in the car brand, model, years and more details, next tap 'Submit to report the issue. Our engineers will record your problem and research possible solutions
