## **PLEASE:**

1. Make sure to clean your windshield from any dust particles.

2. Remove the protective film of the suction cup and press the suction cup on the front windshield to remove the bubbles. Turn the wrench of the suction cup to the lock position to fix the bracket.

### **! NOTE**

- Make sure that the camera view is not obstructed by window tint or any other object.
- If your vehicle has side curtain airbags, exercise caution when routing cables along the vehicle windows. Ensure that the cables do not pass in front of any of the airbags, as this can impede the proper deployment of the airbags.
