

OPTONICA

User Manual

1. Turn off the power switch (Picture 1)
2. Unscrew the mounting bracket screws from the lamp mounting base (Picture 2)
3. Secure the mounting bracket to the ceiling using the supplied screws and wall plugs, tightening them firmly (Picture 3).
4. Connect the input terminals of the junction box to the mains power supply (220V-240V) (Picture 4).
5. After wiring, fasten the lamp base to the mounting bracket with screws (Picture 5).
6. Remove the lamp holder thread cover, then attach the metal mesh and tighten it securely. Next, screw in an E27 light source clockwise. After checking that everything is correct, turn on the power switch – the lamp is ready for use (Picture 6).
