

OPTONICA

User Manual

1. Turn off the power switch (Picture 1)
2. Unscrew the mounting bracket screws from the lamp mounting base (Picture 2).
3. Secure the mounting bracket to the ceiling using the screws and wall plugs provided in the installation kit, tightening them firmly (Picture 3).
4. Unscrew the front ring of the lamp, install the GU10 light source, then screw the front ring back on tightly (Picture. 4).
5. Connect the input terminals of the junction box to the mains power supply (220V–240V) (Picture 5)
6. After wiring, fasten the lamp base to the mounting bracket with screws (Picture 6).
Once everything is confirmed to be correct, turn on the power supply.
